

i-Energy Saver

Energy Saver Multi Function System

Total Control On Your Heating/Cooling Consumption & Expenses

- Decide How Much You Want to Spend
- Real Time Heating Fuel Cost Display
- Power Consumption Display
- Operating Time Display
- Timer
- Thermostat
- Thermometer
- Clock

i-Energy Saver

Energy Saver Multi Function System

The i-Energy (intelligent Energy Saver) is an Energy Saver Smart Multi System which can be used in all Heating Systems like Infra Red Heating Panels, Oil Heating Panels, all kind of Stoves, and Cooling System such as Air-Conditioned Systems, and many other applications . . .

The Crackdown on Consumption and consequently on the Heating/Cooling Costs is achieved by specifying to the system the maximum amount of money which you want to spend in a given period of time. The device will stop the Heating when this amount has been reached.

The Real Time Display helps control the progress of your Consumption & Expenses.

The Online 24-hour timer and the Electronic Thermostat system permits to achieve different operational scenarios (6 Different Scenarios Daily).

The Working Time Display helps to control the consumption.

Technical Specifications

Operating Voltage : 230 VAC

Operating Current : 50 mA

FUNCTIONS

Control your Heating/Cooling Budget by setting a Maximum Limit to your Expenses

Continuous Monitoring of your :

1. Heating / Cooling Costs
2. Power Consumption
3. Total Operating Time
4. Temperature

Room Temperature Electronic Thermostat

Programmable 24 Hours / 6 Intervals Timer

LOAD

Voltage : 230 VAC

Max Current : 10 Amp

Max Power : 2300 Watt

FUSED LOAD PROTECTION

NO NEED OF EXTRA RELAY

Dimensions : 111 X 81 X 39mm LxWxD

CE APPROVAL

5 YEARS WARRANTY
